SUMMARY

Business Intelligence professional with 4+ years of experience designing scalable analytics solutions, developing reporting pipelines, and transforming large multi-source datasets into actionable business insights. Proficient in SQL, Power BI, Excel, and Python, with expertise in data modeling, ETL, dashboard development, KPI frameworks, data quality, and executive reporting. Proven ability to automate reporting processes, improve metric reliability, and partner with cross-functional stakeholders to deliver self-service analytics and data-driven business solutions in fast-paced environments.

CORE SKILLS

Analytics & Business Intelligence:	SQL (Advanced, CTEs, Window Functions, Query Optimization), Power BI, Power Query, Dashboard Development, KPI Development, Executive Reporting, Data Visualization, Self-Service Analytics, Data Storytelling
Data Engineering & Data Management:	Data Modeling, Dimensional Modeling, ETL, Data Integration, Reporting Pipelines, Data Validation, Data Quality Assurance, Reporting Governance, Root Cause Analysis
Programming & Tools:	Python, Excel (Advanced), Redash, HubSpot CRM, Google Analytics, Zapier, Mailchimp, Microsoft Office
Business & Stakeholder Management:	Business Requirements Documentation, Cross-functional Collaboration, Executive Communication, Process Improvement, User Acceptance Testing (UAT), A/B Testing

PROFESSIONAL EXPERIENCE

Data Analyst, Rosenberg Research Toronto, ON, Canada | Jun 2021 – Mar 2026

- Developed and optimized **50+ complex SQL queries**, reporting pipelines, and analytical workflows, reducing ad-hoc analysis turnaround time by **40%** while improving reporting scalability and data reliability.
- Designed, developed, and maintained scalable executive dashboards and **self-service reporting solutions** using Redash, improving decision-making speed by **30%** across Sales and Marketing teams. Automated recurring reporting workflows, eliminating **10+ hours/week** of manual effort while improving reporting consistency and operational efficiency.
- Standardized KPI definitions, implemented data validation rules, and strengthened reporting governance, reducing reporting discrepancies and increasing stakeholder confidence in business metrics.
- Consolidated, transformed, and modeled multi-source datasets into analysis-ready reporting layers, improving data accessibility and enabling unified business visibility.
- Developed automated data quality monitoring processes to proactively identify recurring reporting issues and reduce downstream data inconsistencies.
- Conducted large-scale UAT and A/B validation testing for product releases, uncovering critical defects prior to deployment and improving release reliability.

- Partnered cross-functionally with Sales, Marketing, and Engineering teams to translate business requirements into scalable analytical solutions. .

Senior Systems Engineer, Infosys Ltd. Chennai, India | Jun 2016 – Jul 2019

- Delivered **3 end-to-end data-driven solutions** across the **full SDLC**: each shipped on schedule, **zero post-launch rollbacks**.
- Reduced **data-processing errors by ~20%** through **automated validation checkpoints** and **structured data-handling standards** on large, **multi-format datasets**.
- Collaborated with development and QA teams to translate business requirements into reliable software solutions, ensuring successful production deployments and improved application quality.

PROJECTS

- **Talent Acquisition Analytics Dashboard – Using Power BI** | [GitHub](#) | [PDF](#)

Power BI · Power Query · DAX · Python · Data Modeling

Built an end-to-end HR analytics solution by transforming **8,600+ recruitment records** into a **12-table dimensional model** using Power Query and DAX. Developed **75+ DAX measures** and a six-page interactive dashboard covering hiring funnel, workforce planning, recruitment source effectiveness, diversity analytics, and executive KPI reporting, applying ETL, data quality validation, drill-through, and time intelligence techniques.

- **NexaMart Retail Analytics – Using SQL** | [GitHub](#)

MySQL · DBGate · Data Cleaning · Data Integrity

Designed a **14-table relational schema** and wrote **17 advanced SQL queries** using CTEs, window functions, and correlated subqueries on **5,738 retail transactions (\$3.18M revenue)**. Performed data validation, optimized joins, and resolved a broken tax-rate lineage through a multi-table UPDATE JOIN across geography dimensions.

- **AdventureWorks Business Intelligence Dashboard - Using Power BI** | [GitHub](#) | [PDF](#)

Power BI · DAX · Power Query · Data Modelling

Developed a four-page executive dashboard by integrating data from **10 source tables**, performing ETL and dimensional modeling in Power Query. Built interactive KPI reporting with DAX measures, enabling analysis of sales performance, customer trends, and business growth through self-service visualizations.

EDUCATION

MBA, Operations Management — Brock University, St. Catharines, ON, Canada

BE, Electronics & Communication Engineering — RMD Engineering College, Chennai, India

AWARDS AND RECOGNITIONS

- Lifetime Member, Beta Gamma Sigma — awarded to the top 20% of graduate students globally.
- Runner-Up, MBA Games 2021 Academic Case Competition — Université Laval, QC.
- 2nd Place, Power BI Data Visualization Competition — Brock University, Mar 2020.
