SUMMARY

Data Analyst with **4+ years** of experience **retrieving and analyzing** large, **multi-source datasets** to surface **process-improvement opportunities** and drive **data-driven decision-making**. Expert in **SQL, Excel, and Python**; proven ability in **designing and deploying scalable, automated dashboards** and **reporting systems** that leadership teams rely on. Comfortable operating with **ambiguity** — consistently delivers **structured insights** and clearly written **business artifacts** from incomplete data.

CORE SKILLS

Data Retrieval & Analysis:	SQL (CTEs, window functions, query optimisation), Python, MS Excel (Advanced)
BI & Reporting:	Power BI, Redash, Automated Dashboard Development, KPI Design & Monitoring
Data Systems:	Data Mining, Data Modeling, ETL, Data Validation & Integrity
Stakeholder Communication:	Business Requirements Documentation, Executive Artifact Writing, Data Storytelling
Tools & Platforms:	HubSpot CRM, Google Analytics, Zapier, Mailchimp, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Data Analyst, Rosenberg Research Toronto, ON, Canada | *Jun 2021 – Mar 2026*

- Owned the development and optimization of **50+ complex SQL queries, reporting pipelines, and analytical workflows**, reducing ad-hoc analysis turnaround time by **40%**
- Designed and maintained **scalable executive dashboards and automated reporting solutions (Redash)**, improving decision-making speed by **30%** across Sales and Marketing teams
- Conducted deep-dive analyses on customer engagement and campaign performance, identifying actionable insights that improved campaign effectiveness by **15–20%**
- Automated recurring reporting workflows, eliminating **10+ hours/week of manual effort** while improving reporting consistency and operational efficiency
- Standardized KPI definitions and implemented **data validation and integrity checks**, reducing reporting discrepancies and increasing stakeholder trust in business metrics
- Conducted large-scale **UAT and A/B validation testing** for product releases, **uncovering critical defects** and performance issues prior to deployment, **reducing production incidents, patch fixes, and rollback dependencies** while improving release reliability.
- Partnered cross-functionally with Sales, Marketing, and Engineering teams to solve **ambiguous business problems**, translating stakeholder needs into scalable analytical solutions
- Consolidated and transformed **multi-source datasets into analysis-ready reporting layers**, improving data accessibility and enabling unified business visibility
- Optimized SQL query performance and reviewed reporting logic to improve **data pipeline reliability, reporting accuracy, and scalability**
- Performed root-cause analysis and troubleshooting on reporting and data issues, proactively identifying inconsistencies and improving overall data quality

- Delivered data-backed recommendations and insights to leadership, influencing business decisions and prioritization initiatives

Senior Systems Engineer, Infosys Ltd. Chennai, India | Jun 2016 – Jul 2019

- Delivered **3 end-to-end data-driven solutions** across the **full SDLC**: each shipped on schedule, **zero post-launch rollbacks**.
- Reduced **data-processing errors by ~20%** through **automated validation checkpoints** and **structured data-handling standards** on large, **multi-format datasets**.
- Engaged in a fast-paced environment as a developer with clients across different countries
- Mentored and trained new joiners who faced difficulties in programming language and business domain, enabling better understanding across the team.
- Worked in-line with testing teams to clarify business logic to deliver error-free applications.

PROJECT & TOOLS

- **NexaMart Retail Analytics – Using SQL** | [GitHub](#)

MySQL · DBGate · Data Cleaning · Data Integrity

Designed a 14-table star schema and wrote 17 advanced SQL queries — including CTEs, window functions, and correlated subqueries — on 3 years of retail transaction data across 5,738 orders and \$3.18M in revenue.

Discovered and resolved a broken tax rate lineage via a 3-table UPDATE JOIN across geography dimensions.

- **AdventureWorks Business Intelligence Dashboard - Using Power BI** | [GitHub](#) | [PDF](#)

Power BI · DAX · Power Query · Data Modelling

Built a 4-page interactive sales dashboard analyzing 10 CSV data sources.

- **Business Intelligence Reporting**: Built KPI dashboards tracking sales and user engagement, enabling leadership to monitor performance and identify growth opportunities
- **CRM Data Integration**: Integrated multiple marketing and CRM tools, improving **data consistency and cross-platform visibility**

EDUCATION

MBA, Operations Management — Brock University, St. Catharines, ON, Canada

BE, Electronics & Communication Engineering — RMD Engineering College, Chennai, India

AWARDS AND RECOGNITIONS

- Lifetime Member, Beta Gamma Sigma — awarded to the top 20% of graduate students globally.
- Runner-Up, MBA Games 2021 Academic Case Competition — Université Laval, QC.
- 2nd Place, Power BI Data Visualization Competition — Brock University, Mar 2020.
